Dr. Nancy Clevette

Family Physician – FHO/FHT Practice - Ottawa

A well-established FHO/FHT family practice in Ottawa is available for transition in Fall 2021.

The practice includes 1340 rostered along with 200 non-rostered patients, who are a nice mix of ages and stages. While the current practice does not include procedures or obstetrics, there would be opportunities for physicians to apply their additional skills in the areas of OB, care of the elderly, procedures, or palliative care if desired.

The practice provides for a congenial workplace with a wonderful team of independent health professionals who provide services and programs for the patients. On-site there are 4 RN's, 2 nurse practitioners, 2 social workers, a registered dietitian, pharmacist, psychologist, and health promoter. There is almost always a friendly RN nearby to provide telephone advice, immunizations, dressing changes and other nursing care.

Overhead is very reasonable and the practice runs smoothly with the PS Suite EMR. Current schedule includes 3 days of care via phone and 1 day of in-office. A mentorship period can be arranged if desired.

Looking for someone to take over who is a great fit with my colleagues and patients. To find out more, please send your CV to Dr. Nancy Clevette at nclevette@rogers.com
