The Family Medicine Interest Group (FMIG) provides a variety of events to promote family medicine and encourage medical students to consider family medicine as their career choice.

FMIG is proud to provide students with an opportunity to practice and learn clinical skills that are commonly seen in the practice of family medicine through our Clinical Skills for Family Practice workshops. This event provides a basis of learning to 1st year medical students before going off to their Rural Week in May and an opportunity for 2nd year students to get a head start on their skills prior to Year 3 clerkship.

We are looking for leaders to facilitate these sessions!

We will be running six 30-40 minute workshops throughout the day.
These introductory sessions are:

1. IV Insertion and IM Injection
2. Pelvic Exam and IUD Insertion
3. Suturing and Biopsies
4. Airway and Tracheostomy
5. Lumbar Puncture
6. Ultrasound

Snacks and lunch will be provided, along with a gift of appreciation.

If you are interested in leading one of these sessions, please contact us at fmig.ottawa@gmail.com

Thank you for your participation! Sincerely,

FMIG Coordinators
Adam Chubbs-Payne, Emi Vargatoth, Avika Misra and Emily Seale
