Job Posting: Family Physicians - Integrated Virtual Care

We are looking for family physicians with an interest in virtual care, to join an innovative program to help more people have access to family physician led, team based, comprehensive primary care.

*Family physicians can be based anywhere in Ontario to take advantage of this exciting opportunity.*

Our family physicians are fully supported by a local Family Health Team, community paramedics and Health Link care coordinators. Patients have access to all aspects of comprehensive primary care with options for in-person, at-home and virtual care, depending on their individual needs and preference. Physicians deliver care to patients remotely by telephone, video and secure messaging. Nurse practitioners and a range of allied health professionals provide in-clinic care and community paramedics and Health Link nurses provide at-home care options. Telemedicine options allow the patients to come to clinic, be supported by a nurse and have a video encounter with their family physician. Digital exam cameras, otoscopes and stethoscopes enable a much broader range of examination to take place by the family physician working remotely.

Family physicians can work highly flexible hours with roster size being based on number of hours worked per week. Compensation is by a generous blended salary model including benefits, pension and paid vacation, with no overhead expenses. If you would like to learn more about this this exceptional opportunity, then please contact Dr. Jonathan Fitzsimon (jfitzsimon@arnpriorfht.ca).
