Performing advanced hysteroscopy

Key Features:
- This EPA includes performing complex diagnostic and operative hysteroscopy, including patient positioning, selection and appropriate use of instruments and distention medium, risk reduction, and injury prevention and recognition
- This EPA may be observed in the operating room, or outpatient hysteroscopy suites
- The observation of this EPA is divided into two parts: direct observation of surgical skills; a log of procedures to demonstrate the breadth of experience

Assessment Plan:

Part A: Procedural skills
Direct observation by OBGYN faculty, or subspecialty trainee

Use Form 2. Form collects information on:
- Procedure: endometrial resection; endometrial ablation; myomectomy; septoplasty of partial/complete septum; lysis of intrauterine adhesions; other

Collect 5 observations of achievement
- At least 1 endometrial ablation (resectoscopic or rollerball)
- At least 2 myomectomies
- At least 2 different observers

Part B: Logbook
Submit logbook of procedures

Logbook tracks
- Procedure: endometrial resection; endometrial ablation; myomectomy; septoplasty of partial/complete septum; lysis of intrauterine adhesions; other
