3.4 Police-involved Shootings in the USA.
Dr Judy Melinek MD
CEO, Pathology Expert Inc
Contract Forensic Pathologist – Communio
Wellington Hospital
Wellington, New Zealand

Learning Objectives
At the end of the presentation, participants will be able to:

1. State what questions they will be expected to answer in officer-involved shooting deaths.
2. Discuss what evidence can help elucidate the relative positions of the shooter and decedent.
3. Describe how autopsy diagrams can be used in forensic animation to demonstrate trajectory in court exhibits.

Abstract
Dr. Melinek will give examples of high-profile cases from her own experience as a forensic pathologist and from her work as a consultant in officer-involved shooting incidents.
